

The 4th China-Italy Innovation Forum

Science Parks Tour

Date: Saturday, Nov 16th

Schedule

Time	Place	Content	Remark
9:00 AM	Lobby Hall of Four Points by Sheraton Beijing, Haidian Hotel & Serviced Apartments	Assemble	Two vehicles driving to different destinations, you can choose one of them
9:30	Arriving at the Science Parks		
9:30-12:00	In the Science Park	Visiting the Science Parks and partnering with enterprises	
12:00	Driving back to Dinghao Building, China International Technology Transfer Center		
12:30	20th floor, Ding Hao Building	Luncheon	
13:30	China International Technology Transfer Center	Project Matchmaking	

Everyone can choose one place to visit among the three Science Parks.

Please tell us your interest place before Nov. 14th.

Brief Introductions of the Three Science Parks

仪科技孵化器
GYI TECHNOLOGY INCUBATOR

Beijing Jingyi Strategic Emerging Industrial Base

Jingyi Technology Incubator (Jingyi Strategic Emerging Industrial Base) is wholly-owned by Beijing Instrument Industry Group Co., Ltd. Upon the industrial resources of Beijing Instrument Industry Group, Jingyi Technology Incubator aims to “integrate industrial resources, accelerate the industrialization of high and innovative technologies, culture excellent hi-tech companies for the industry, and promote the hi-tech industry development”.

Jingyi Technology Incubator (Jingyi Strategic Emerging Industrial Base) is located at the core district of Zhongguancun Science Park. The lodging companies at Jingyi Technology Incubator will enjoy preferential policies from Zhongguancun Science Park and the superior industrial and academic resources of Zhongguancun, which is very helpful to improve the independent innovation capability of the lodging companies.

Jingyi Technology Incubator (Jingyi Strategic Emerging Industrial Base) is focused on automatic instruments, scientific instruments, and technologies related with IOT (Internet of Things). Its core business is to provide business incubation services including technical support, technology transfer service, professional financing and investment service, consulting and marketing services to the SMEs in related fields.

- Public Incubation Platform for Small Companies:
Technology Service Platform for Key Technologies of instrument industry + Technology Consulting Platform + Marketing Platform + Technology Transfer Platform + Professional Investment and Financing Platform.

Zhongguancun Life Science Park

Zhong-guan-cun(ZGC) Life Science Park is a professional science park developed by the Beijing Municipal Government. It is an important part of ZGC Science and Technology Park system, and is developed according to the Written Approval from the State Council to accelerate the development of the ZGC Science and Technology Park, to launch the Beijing "248" Technology Innovation Project, and to develop the knowledge-based economy in the capital area.

Being authorized by the Beijing Municipal Government, ZGC Life Science Park Development Co.,Ltd. is responsible for the work of primary land development and business promotion. Aiming to build a national innovation base for life sciences, new medicines, and advanced pharmaceuticals, ZGC Life Science Park is closely tied with major national developmental projects in

the life sciences field and will strictly follow the life sciences orientation of the government and the State Council.

ZGC Life Science Park aims at building an international-level first class science and technology park and will be developed into an international high-tech park that integrates the R&D of life sciences, enterprise nurturing, mid-test and production, result appraisal, bio-technology project issuance, venture capital, international exchange and personnel training.

Zhongguancun Environmental Protection Sci&Tech Demonstration Park

Zhongguancun Environmental Protection Sci&Tech Demonstration Park (“Environmental Park”), a part of Haidian Development Cluster of Zhongguancun Science Park, is located in new district of north Haidian and has been named Beijing’s Major Project for three successive years.

The vision of the Environmental Park is to become a synthetic park integrating research, pilot, manufacturing, trade, technology exchange, and science popularization; a sustainable park with complete green and environment protection system; an ecological park characterized by oasis and wetland landscape system; and a park specializing in environmental protection industry R&D, presentation and exchange. Rainwater harvesting and utilization, reuse of reclaimed water, and other resource recycling technologies, as well as wind power, solar power and other energy use demonstration works have been incorporated in the development of the Environmental Park and phased objectives of developments and constructions have been achieved. Enterprises of the Park are interested in attracting investment from Italy and establishing relationship with the Italian side in respect of R&D and marketing. The Park also desires to work with Italian incubators and parks to carry out training, business incubation and other activities.
