

序号	Company name	Company profile	Note
1	Robust (Chongqing) Food & Beverage DWC China	Danone Group, founded in 1966 with its headquarter in Paris, France, is one of the world's leading food and drinks groups. Robust (Chongqing) Food & Beverage is a wholly-owned subsidiary of Danone Group in China and a foreign-funded enterprise established in October 2000.	
2	Syncmold Group - Chongqing Fuhongqi Electronic Co., Ltd.	Chongqing Fuhongqi Electronic Co., Ltd. is a Taiwan-funded enterprise specialized in assembling computer mounting brackets and spindles, and has more than ten factories over the country for providing services to customers more easily: major customers include Foxconn, Inventec, Quanta , HP, DELL, LENOVO, SONY, ACER and other famous brands. A factory is set up in Chongqing. At present, the workshop has been built and include office buildings, production workshops and staff dormitories. There are plastic molding department, stamping department, paint-drying department, base assembly department and other production departments integrating research and development, mold making, sample development, components production, product assembly, etc. and mainly serving for Foxconn, Inventec, Quanta and other customers.	
3	Chongqing Jinguan Automobile Manufacture Co., Ltd.	Founded in 1998, Chongqing Jinguan Automobile Manufacture Co., Ltd. is a large modern high-tech share-holding enterprise integrating research, manufacturing and sale of various special vehicles, protective & explosion-proof products, etc., and has a registered capital of 50 million yuan. At present, the company has 18 series of products in ten categories (pullet-proof vehicles, communication vehicles, logistical support vehicles, site disposal vehicles, scout vehicles, medical vehicles, all-terrain vehicles, protective products, sanitation vehicles and recreational vehicles) which are widely applied to fields of finance, energy sources, insurance, public security organs, transportation, medical treatment, fire protection and national defense. More than 50 varieties of products have been listed in the national automobile product announcement. The Company has more than 40 patent technologies and ranks top in terms of annual sales in the same domestic industry for many years.	

4	Chongqing Hongtudi Industrial Co., Ltd.	<p>Chongqing Red Land Industrial Co., Ltd., a private enterprise specialized in producing upscale leather shoes, is founded in December 1998 with a registered capital of 10 million yuan. Our " Hongtudi " men and women 's shoes are highly appraised by peer experts, consumers and governments for new style, high quality and excellent technology. In 1997, the ""Hongtudi" trademark was registered in the State Administration for Industry and Commerce; in 1999, the package for "Hongtudi" was registered in the State Intellectual Property Office and passed ISO9001:2000 international quality system certification in 2002. It has domestic advanced production line and checkout equipment, and has become one of the modern shoe manufacturers with strong competitiveness. At present, a series of "Hongtudi" brand products see a good sale in more than 20 provinces, cities and autonomous regions such as Shenyang, Chengdu, Beijing, Shanghai, Guangzhou, Chongqing and Tianjin, and are exported to the nations and regions such as Russia, Kazakhstan, Kyrgyzstan and Alma-Ata.</p>	
5	Chongqing Hongyu Precision Industry Co.,, Ltd.	<p>Chongqing Hongyu Precision Industry Co.,, Ltd., affiliated with Fortune Global 500 - China South Industries Group Corporation, is a large-scale state-owned enterprise which is uniformly planned and constructed by state and integrate scientific research with production.</p> <p>It, founded in 1969, has total assets of to 3 billion yuan. Hongyu vigorously promotes technological innovation, actively introduces high-end talents, and increases science and technology investments for making itself as a technological innovation leading enterprise. With an increasing scientific and technological innovation ability and core competitiveness, Hongyu has won more than ten national science and technology awards and more than 50 science and technology awards at the ministry level, meeting the domestic demand for technologies in more than ten fields.</p>	

6	Chongqing Jinlun Industrial Co., Ltd.	Chongqing Jinlun Industrial Co., Ltd., established in July 1998 with a registered capital of 32.96 million yuan, is mainly engaged in metal production and plating on plastic. Production and sale: parts (excluding engines) , mechanical parts , forged pieces and tooling of automobile and motorcycles. In 2014, it had a sales revenue of 19.05 million yuan and net profits of -2.98 million yuan, and paid taxes of 1.11 million yuan.	
7	Jingyuan (Chongqing) Computer Co., Ltd.	Taiwan Jingyuan Computer Co., Ltd. is the world's first largest manufacturer in laptop and mouse. The Group sets up large-scale independent companies in Shanghai, Shenzhen, Jiangsu and Jiangxi. A new factory was established in Bishan Industrial Park in 2010.  Jingyuan (Chongqing) Computer Co., Ltd. is located in the beautiful Bishan Industrial Park.	
8	Chongqing Regu Robot Technology Co., Ltd.	Chongqing Regu Robot Technology Co., Ltd. is a wholly-owned subsidiary of Chongqing Langzheng Technology Co., Ltd., and is a high-tech enterprise engaged in the research and development, manufacturing, integration, sales and consulting services on robots with the robot technology as the core. It provides a complete set of professional solution in automation for customers, and achieves wholly auto-control in layout, crawling, loading, processing, unloading and logistics of work pieces. It not only provides quality products, but also offers all-around services in the aspects such as system solutions, design and development, integrated manufacturing, installation and commissioning, training and guidance and technical advice. In June 2014, it became one of the first-batch robot enterprises introduced by the Chongqing Bishan Robot Industrial Park, and owns proprietary intellectual property rights on robots. The Company covers a workshop of 5,000 square meters and office space of 2,000 square meters and has productions lines in Cartesian coordinate robots, parallel robots, truss manipulators, cylindrical coordinate robots, etc.	

9	Chongqing Bishan Ruitong Accurate Die Casting Co., Ltd.	<p>Chongqing Bishan Ruitong Accurate Die Casting Co., Ltd. ("Ruitong") was founded in February 2013 with a registered capital of 16 million yuan. It is located in the Qingshan Industrial Park, Qinggang Town, Bishan County. Ruitong, put into operation on June 1, 2013, is equipped with the first-class management, technology and research and development team and world class machinery equipment. At present, the Company has more than 180 employees.</p> <p>Business scope of Ruitong: Production and sales of aluminum die-casting blank. The Company is mainly engaged in providing the extension boxes of speed aviators and the transmission blanks of cars to Chongqing Ruitong Industrial Co., Ltd. and Qingshan Industry Co., Ltd. Our production capacity can reach 1 million sets of extension boxes and 700,000 sets of transmission blanks.</p>	
---	---	---	--

10	Chongqing Landai Powertrain Co., Ltd.	<p>Chongqing Landai Powertrain Co., Ltd., established in 1996 with a registered capital of 50 million yuan, is a well-known private enterprise in producing automotive transmission assembly and parts. It has annual sales of 1.04 billion yuan .</p> <p>In 2010, the Company built a new plant equipped with more than 900 numerical control machines, and imported a batch of advanced equipment such as CNC milling cutter, cylindricity measuring instrument and gear composite error tester from Japan, Germany, Italy, Taiwan and other regions. The Company has built one transmission assembly laboratory, and one Chongqing municipal technology center. In 2007, the Company established an all-round cooperative relations in technologies and trade with South Korea KOPARS, and put focus on developing overseas market in transmission products. In 2008, the Company cooperated with the British Antonov Co., Ltd. in manufacturing and selling six-speed automatic transmission. At present, the company is capable of doing research and development in and producing a variety of manual and automatic transmission.</p> <p>The Company has a capacity of manufacturing 300,000 transmission assembly of (micro) cars, 1 million sets of gears, 200,000 sets of engine cylinder body blanks and 3.5 million sets of main and counter shaft gear of motorcycles. Major domestic customers include Geely Automobile, Chery Automobile, Chongqing Lifan, Chongqing Changan, Dongfeng Yu'an, Qianjiang Motorcycle and other well-known enterprises, while major customers are from Middle East and Southeast Asia. The Company's transmission products are exported in batches with an average annual sales of 10 million US dollars.</p>	
----	---------------------------------------	--	--

11	Chongqing Yuhai Mold Limited Company	<p>Chongqing Yuhai Mold Limited Company (the "Company"), established in April 2008, is engaged in research and development, manufacturing and sale of plastic products, mold, electronic products and components, packaging materials, auto parts, hardware fitting and machinery parts; recycling of metals, chemicals and waste and old materials; Import and export of goods and technology.</p> <p>Currently, the Company, the largest supporting enterprise in plastic shell among domestic enterprises in Bishan District, Chongqing, is committed to parts development and manufacturing integrating mold development, molding, nails burring and assembly in the notebook field.</p> <p>The Company's has assets in hand of 111,840,000 yuan including 41.33 million yuan in fixed assets; there are mold workshop, molding workshop, nail burying workshop, assembly workshop and painting shop with more than 150 professional production equipment;</p> <p>The Company, mainly engaged in plastic products mold, molding, nail burying, assembly and production of plastic products of notebooks, has established a very close strategic partnership with large-scale notebook system factories such as Inventec, Quanta and Wistron and become an important matching supplier and qualified supplier for them.</p>	
12	Chongqing Zongshen Motor Tricycle Manufacturing Co., Ltd.	<p>Chongqing Zongshen Motor Tricycle Manufacturing Co., Ltd. (the "Company") was founded in 2001 with a registered capital of 10 million yuan. Since January 2008, the Chongqing Lzhixing Motor Tricycle Co., Ltd. has changed production line to the Company.</p> <p>The Company has developed more than 30 models of motor tricycles in two brands, namely, Zongshen and Lzhixing, which are sold out in more than 100 large and medium-sized cities nationwide. Our products are exported to Middle East, South America, Southeast Asia, Africa and other nations and regions, and are well received among customers. Now, the Company owns more than 20 national patents.</p>	
13	Chongqing LiyaoTechnology Co., Ltd.	<p>Chongqing Liyao Technology Co., Ltd. was established in 2011 with registered capital of 70 million yuan. Products: heat dissipation module/ heat pipe BEOL / fan assembly</p>	

14	Chongqing Wantai Electric Power Technology Co., Ltd.	<p>Chongqing Wantai Electric Power Technology Co., Ltd. is a high-tech enterprise specialized in optical safety monitoring, research and development, production and sales of monitoring system and the relevant services. It has a registered capital of 320 million yuan . The Company is able to produce 15,000 sets of fiber-optic sensing analyzers, 760,000 optical fiber sensors and 5,000 kilometers of smart composite cable every year with annual value of production of 1 billion yuan.</p> <p>The Company relies on strong technical support and knowledge reserves of Beijing National Technology Transfer Center of CAS to build ultra-precision optical sensors, smart composite cable and supporting network analysis system. The whole industry chain integrates research and development, design, production, testing, sales, data collection and analysis. After a whole industry chain of ultra-precision fiber optic sensing systems and intelligent composite cables is turned into large-scale production, the project will expand the industry chain, and focus on building a core industry of smart grid devices (smart carbon fiber composite cable, intelligent substation equipment, smart meters and meter reading), biosensors and internet of things. Finally, the Company will become an integrated service provider with ultra-precision sensing system as the core, and integrate network analysis system, smart grid core products, bio-sensing, and internet of things.</p> <p>The Company has an independent research and development institution and a production department, and actively explore for a development path combining production, study with research together with research institutions and well-known universities at home and abroad. The Company does research in the optical fiber sensing field, and tackle critical problems in some key technologies to make prominent achievements especially in ultra-high temperature, ultra-low temperature, high strain, high precision and special packaging and other aspects of fiber optic sensing. It has five software right, five utility model patents, and two patents for invention. Now it is a local standard maker in Chongqing optical fiber sensing industry.</p>	
----	--	---	--

15	Chongqing Chengrun Machinery Co., Ltd.	<p>Chongqing Chengrun Machinery Co., Ltd. (the "Company") was established in December 12, 2003 with registered capital of 3 million yuan. The Company is a private enterprise specialized in processing and sales of automotive transmission parts and transmission parts mainly for Wuhan KYOWA Synchronizer Ring Co., Ltd. (Sino-Japanese joint venture), SDS (Chongqing) Co.,Ltd. (Sino-British joint venture), Shengrui transmission Corporation Limited, Chongqing Landai Powertrain Co., Ltd., etc.</p> <p>The Company has more than 100 mechanical processing devices (including 10 devices such as advanced physical and chemical test equipment, X-ray detection machine, tensile testing machine, universal material testing machine and metallographic microscope, which can detect mechanical performances of all kinds of equipment to ensure the storage of raw materials, process and quality control of finished products).</p>	
16	Chongqing PAPT Cable Co., Ltd.	<p>Chongqing PAPT Cable Co., Ltd. was established in May 2005 with a registered capital of 201.6 million yuan. The Company is a modern enterprise specialized in research and development, production and sales of wire and cable. It has become a wire and cable manufacturing enterprise with annual output value of hundreds of millions yuan.</p> <p>Chongqing PAPT Cable Co., Ltd. is mainly engaged in wire and cable production, research and development and sales with main products including power cables, urban rail transit cables, communication fire-retardant cables and other special cables, automotive heat sink, cables copper rod, copper, etc. and major customers including State Grid, China Southern Power Grid and power supporting enterprises, China Railway, China Telecom, China Mobile, China State Construction and other enterprises directly under central management. The Company is equipped with international advanced production line and testing equipment; establish a sound design, research and development, manufacturing and marketing system; and has a strong strength in product research and development, manufacturing and marketing. It develops extensive school-enterprise cooperation with Chongqing University and other famous universities.</p>	

17	Farah Vegas Footwear Co., Ltd.	Farah Vegas Footwear Co., Ltd., established in March 2002 with a registered capital of 500,000 yuan, boasts convenient transportation with its business of place in Aokang Industrial Park near to Biqing Road. Since the date of establishment, the Company has been dedicated to research and development, production and sales of women's shoes, casual shoes, sandals and other leather products.	
18	Gangfeng Office Furniture Co., Ltd.	Gangfeng Office Furniture Co., Ltd., founded in April 2000, is a furniture manufacturing enterprise specialized in production of desks, filing cabinets, conference tables, chairs and other furniture, and integrating research and development, manufacturing and sales . It owns the "Gangfeng", "COF" and other famous brands.	

19	Chongqing KZJ New Materials Co., Ltd.	<p>Founded in 2008, Chongqing KZJ New Materials Co., Ltd. (the "Company" or "Chongqing KZJ") is a pioneering technological enterprise under XMABR Group. The Company is also one of the research and industrialization bases for multifunctional concrete additives of KZJ New Materials Group in southwest China, especially dealing with the market transformation and application of the scientific research achievements relevant to concrete additives.</p> <p>Chongqing KZJ, with its largest scale and most advanced production equipment in Chongqing City, is one of the suppliers for technology integration planning of concrete additive production and application. Chongqing KZJ has set up production facilities such as synthesis workshop, compound workshop, material storage and laboratory. The Company has several production lines for chemical synthesis, liquid agent compound and powder agent compound, and is able to provide water reducer of polycarboxylate acid series, aliphatic series and naphthalene series and so on. Meanwhile, the Company has applied the most advanced automatic control system in China into production and can tackle key technology problems according to the actual needs and carry out customization production.</p> <p>Based on Chongqing, the Company spreads itself to southwest China and has set up business office in the cities like Chengdu. Its business has covered the provinces and municipalities such as Chongqing, Sichuan, Yunnan and Guizhou. By far, the Company has provided customized concrete additive products of excellent quality for several difficult and important projects including Chongqing Dongshuimen Bridge, Chongqing Light Rail project, Chongqing Convention and Exhibition Centre, Chongqing International Expo Center, Chongqing Public Rental Housing Project, Chongqing financial center.</p>	
----	---------------------------------------	--	--

20	Chongqing Dajiang Power Equipment Co., Ltd.	<p>Chongqing Dajiang Power Equipment Co., Ltd., established in 2004, is a large-scale manufacturing private enterprise in gasoline engine integrating research and development and design, production and sales with a registered capital of 8 million yuan and its nature of limited liability company. After many years' efforts, the Company has grown into a first-class enterprise with all-around development and its own management experience and mature corporate culture. In the aspect of production capacity, it has set up six automated production lines with an annual production capacity of one million sets of engines and 600,000 sets of generators.</p>	
----	---	--	--

21	Chongqing Jinguan Automobile Manufacture Co., Ltd.	<p>Founded in 1998, Chongqing Jinguan Automobile Manufacture Co., Ltd. is a large modern high-tech share-holding enterprise integrating research, manufacturing and sale of various special vehicles, protective &amp; explosion-proof products, etc., and has a registered capital of 50 million yuan.</p> <p>At present, the Company has 18 series of products in ten categories (bullet-proof vehicles, communication vehicles, logistical support vehicles, site disposal vehicles, scout vehicles, medical vehicles, all-terrain vehicles, protective products, sanitation vehicles and recreational vehicles) which are widely applied to fields of finance, energy sources, insurance, public security organs, transportation, medical treatment, fire protection and national defense. More than 50 varieties of products have been listed in the national automobile product announcement. The Company has more than 40 patent technologies. Its annual sales ranked the top among the domestic counterparts for many years.</p> <p>The Company has perfect automobile refitting production and detection means including a stamping production line, a protective refitting line, a money box production line, a painting production line consisting of a phosphide priming paint treatment line and a high &amp; low temperature spray chamber, and an automobile performance detection line, a rainfall laboratory, a trajectory shooting laboratory and other production lines controlled by computers. It has a high-precision technical team made up of professionals of automobiles, machines, materials, communication, automatic control, etc. Moreover, the company has created its own brand in the industry of special vehicles and protective explosion-proof products.</p>	
----	--	---	--

22	Chongqing Goody Plastic Electronic Co., Ltd.	<p>Goody Brand, founded in 1979, grows up in Guangdong and then spreads throughout the country. It is a plastic piping professional manufacturer in pursuit for excellence quality, technology innovation and detailed services So far, eight large-scale modern production bases have been established in Chongqing, Hubei, Guangdong, Beijing, Henan, Ma'anshan, Handan and Gansu. On August 16, 2012, Goody Technology (stock code: 002694) was successfully listed in the SME board of Shenzhen Stock Exchange. At present, Goody Technology has established a nationwide sales and service network system with two famous brands, namely, "Goody" and "Tryit", which are exported to more than 10 countries and regions such as Middle East and Southeast Asia.</p> <p>Chongqing Goody Plastic Electronic Co., Ltd. was established in 1995 and moved to Qinggang Industry and Trade District, Bishan County, Chongqing in 2000. The Company, one of China's first and largest professional manufacturer in plastic piping, provides the best plastic products and accessories and all-around services such as design, installation, commissioning, maintenance and technical training for thousands of customers and many national key projects in three fields, namely, home decoration, civil construction and municipal administration. It has a national enterprise technical center as well as "post-doctoral research station" in cooperation with Sichuan University, and seeks for great development in the field of environment-friendly building materials. At present, about 100 product patents have been applied. Chongqing Goody has preserved with technical innovation in the development process.</p>	
----	--	--	--

23	Huxi Electric Industrial Co., Ltd.	<p>Affiliated to China South Industries Group Corporation, Huxi Electric Industrial Co., Ltd. is the only supporting enterprise with independent research and development capabilities in professional development and production in electric motors and key electrical components. The Company is mainly engaged in development and production of special electric fitting products, artificial lift oil production equipment, new energy electronic control equipment. Founded in 1969, the factory is located in Chongqing Bishan Industrial Park and covers an area of 136 acres. As of the end of 2014, the Company is a national large-scale secondary enterprise with strong strength with fixed assets worth of 193 million yuan.</p> <p>After 40 years' development, the factory has been competitive in the development and production of electric fittings such as drive motor, AC servo motors, integrated motors, torque motors, DC motors perform, starting motors, generators and vacuum pumps, electromagnetic clutch, booster fan and submersible pump. It has relatively complete research and production capacity in development and design, machining, stamping, forging, welding, electrical processing, assembly and testing laboratory, and is able to develop and produce a variety of electric fitting products according to the requirements of users.</p>	
----	------------------------------------	--	--

24	Chongqing Hualing Industry Co., Ltd.	<p>Chongqing Hualing Industry Co., Ltd., founded in April 1995, is engaged in production and sales of a variety of mini-cars gears, motorcycle transmission gears. After nearly two decades of development, the Company has become a large-scale base in car and motorcycle parts processing in the southwestern region. It is capable of producing 7 million units of various types of motorcycle mainshaft and countershaft assembly and 3.5 million pieces of other types of transmission gears and drive shafts. In 2015, the Company sees annual output of 328 million yuan. Boasting with strong production capacity, it owns more than 1,000 units of processing equipment, international leading and domestic first-class gear production equipment, and six gear and tool detection equipment, and four sets of advanced measurement, physical and chemical testing equipment in its Germany Klingelberg P26C gear and gear tool inspection center. It introduces two SRS405-CNC razor grinder manufactured by Germany Hurth Company, two Japan Ito numerical control hob grinding machines, three Qinchuan YK7236 gear grinding machines and various types of numerical control machining centers. The Company has its own professional heat treatment workshop including two German Ipsen heat treatment multi-purpose furnace production lines, one Huisen heat treatment multi-purpose furnace production line and two Aichelin heat treatment continuous furnace production lines.</p>	
----	--------------------------------------	--	--

25	China Jialing Industrial Co., Ltd.	<p>China Jialing Industrial Co., Ltd. is a state-owned listed company under the China South Industries Group Corporation. China Jialing's leading products are motorcycles and its engines, special vehicles, general machinery and its downstream products. It has total assets of nearly 4 billion yuan.</p> <p>Nowadays, Jialing's leading products—motorcycles are from 35cc to 600cc, and more than 10 displacement with hundreds of motorcycle models. The total sales is over 18 million, amounting to volume of 1/5 in Chinese market inventory. Jialing has the capacity of producing 2 million motorcycles annually. Jialing has well-established R&amp;D system, experiment system, manufacture system, quality system, supporting system, marketing system, advanced process technology and equipment and perfect quality management system. It also has a national Technology Center (It's the first R&amp;D Center in domestic motorcycle industry), a post-doctoral research workstation, a motorcycle quality testing station, five domestic manufacture base and four oversea subsidiaries. Jialing has set up a nationwide marketing services network in China with more than 6000 marketing service outlets and more than 400 cooperative enterprises. The Company, taking the lead to export "Jialing" motorcycles to international market in 1981, has been exported "Jialing" motorcycles to more than 90 countries and regions. In 2011, the "Jialing" trademark had a brand value of 1,238,500 million yuan and is one of the brands with the highest value in Chinese motorcycle industry.</p>	
----	------------------------------------	---	--

26	Chongqing Shanqing Machinery Manufacturing Co., Ltd.	<p>Chongqing Shanqing Machinery Manufacturing Co., Ltd., originally a collective unit (ie 45th workshop) of Chongqing Qingshan Industry Co., Ltd., was restructured into a stock cooperative enterprise with independent legal person qualification in April 2001.</p> <p>The Company has fixed assets of 35 million yuan , more than 330 units of various equipment such as processing centers, gear system, stamping, welding, turning, milling, grinding, induction hardening, ultrasonic cleaning machines, CMM, cylindrical , hardness tester , tension and compression testing machine , reversing light line airtight , travel and life detectors and more than 400 employees. It mainly produces and sells shift mechanism assembly, motorcycle crankcase, spring, reversing light line, gears, sprockets and other parts and assembly of various types of micro (sedan) cars. The Company has strict management system, strong strength, strong new product development capabilities, testing capabilities, product emergency capacity and perfect quality assurance system, Chongqing Municipal technology center, and more than 20 patents.</p> <p>The Company's customers include Chongqing Qingshan Transmission Company of CCAG, Liuzhou Qingshan Transmission Co., Ltd. Chengdu Qingshan Industrial Co., Ltd., Chongqing Jianshe • Yamaha Motor Co., Ltd. , Chongqing Jianshe Motorcycle Co., Ltd. , Harbin Dong'an Automotive Engine Manufacturing Co., Ltd., Chongqing Longxin motorcycle Co., Ltd. and other regular customers and markets with annual sales revenue of 260 million yuan .</p>	
----	--	--	--

27	Chongqing Intelligence Company	<p>Founded in 1993, Chongqing Intelligence Company is a manufacturing enterprise in motorcycle frame, handle and other parts and auto panels of various vehicles under the jurisdiction of Chongqing High-tech Development Zone, and also a modern enterprise integrating research, development, production, sales and import and export trade. It is accredited as a high-tech enterprise in 2012 and awarded a high-tech products certificate. At present, the Company owns fixed assets worth of 11.99 million yuan and has annual output of about 26.89 million yuan.</p> <p>The leading products include "Suzuki 125 series, Honda series, 102 series, ATV, off-road series, motorcycle frame and fork handles, fuel tank and other parts and panels. The Company provides Zongshen Group, Lifan Group, Longxin Group, Bashan Group and Rato Group and other units with products, which are exported to Southeast Asia, Africa and Latin America.</p>	
28	Chongqing Chengrun Machinery Co., Ltd.	<p>Chongqing Chengrun Machinery Co., Ltd. was established in December 12, 2003 with registered capital of 3 million yuan. The Company is a private enterprise specialized in processing and sales of automotive transmission parts and transmission parts mainly for Wuhan KYOWA Synchronizer Ring Co., Ltd. (Sino-Japanese joint venture), SDS (Chongqing) Co., Ltd. (Sino-British joint venture), Shengrui transmission Corporation Limited, Chongqing Landai Powertrain Co., Ltd.,etc.</p> <p>The Company has more than 110 mechanical processing devices (including 10 devices such as advanced physical and chemical test equipment, X-ray detection machine, tensile testing machine, universal material testing machine and metallographic microscope, which can detect mechanical performances of all kinds of equipment to ensure the storage of raw materials, process and quality control of finished products ) .</p>	

29	Chongqing Tsingshan Industrial Co., Ltd	<p>CHONGQING XING FUJI INDUSTRIAL CO., LTD., established in 2005 with a registered capital of 60 million yuan, is a medium-sized enterprise mainly engaged in manufacturing parts and accessories of auto and motorcycles. It has fixed assets of about 110 million yuan. The Company is equipped with advanced production equipment with four wedge rolling automatic production lines, five isothermal normalizing production lines, and more than 220 domestic and overseas advanced equipment such as Mocha presses, punch presses, milling machines, CNC lathes, roll, slotting machines and Germany high-precision and multi-functional CNC milling centers; and complete detection means with 12 domestic and foreign high-precision testing equipment such as Britain Taylor roughness profilers, Italy Galdabini straightening machines, gear measurement centers, imaging detectors and Brinell hardness testers. It boasts annual production capacity of more than 85 million pieces of shaft forging parts. It invested 60 million yuan in 2014 and 2015 to introduce domestic and foreign advanced equipment, expand four production lines with an annual production capacity of one million sets of transmission (including: 600,000 units of dual clutch transmission (DCT) ).</p>	
----	---	---	--

30	Chongqing Tsingshan Industrial Co.,Ltd.	<p>Chongqing Tsingshan Industrial Co., Ltd is a large state-owned enterprise, affiliated to China South Industries Group Corporation. Firstly established in January 1965 and developed for more than forty years, it has become a specialized enterprise which researches, develops, produces and sells transmission enterprise with largest domestic production and sale scale, most complete product family series and strongest abilities of independent research and development. Its assets total to above RMB 2.5 billion and annual production capacity reaches 2.2 million sets of automobile transmission.</p> <p>Depending on strong technical strength and independent research and development ability, the company has independently developed the first-class new product development process TS-PDS, created industry leading integrated research and development model for whole vehicle, engine and transmission, had 5 leading capabilities of design, analysis, test, verification and matching in China and at international first-class level and built four product platforms including MT, AMT, DCT and new energy that meet the needs of the market and users. Its products cover cars, SUV, MPV, light trucks, minivans and other models.</p>	
31	Chongqing Shenzhou Cable Group Co., Ltd.	<p>Chongqing Shenzhou Cable Group Co., Ltd., located in Qinggang Street, Bishan District, Chongqing, is a modern enterprise specialized in the production of high and low voltage power cables (35KV and lower) and mining fire resistant cables. With the registered capital of RMB 200 million, international advanced production lines and detection equipment as well as an annual value of production of RMB 300 million, the company is one of mining cable manufacturers with the largest scale in southwestern regions and most advanced technical and production equipment. At present, the company's product sales network throughout the country has been sold to Vietnam, Sudan and South Africa etc. and is appreciated and glorified by extensive clients.</p>	

32	Chongqing Fuji Machine Co., Ltd.	<p>As a solely private-owned enterprise, Chongqing Fuji Machine Co., Ltd. is one of the major manufacturers of motorcycle wheel series and ATV wheel series products in China. It has obtained a design patent for 6 front and rear motorcycle wheels. The company has owned fixed assets of over RMB 800 million.</p> <p>The company has strong technical forces and establishes a technology center - motorcycle wheel research and development center with complete measuring, testing, physical and chemical analysis means as well as advanced equipment. It has technology development capabilities for motorcycle wheels, 8 complete production lines and over 20 sets of leading test and inspection equipment, metallurgical analysis meter, hardness meter, radial fatigue test machine, torsion test machine, radial bending test machine, tensile testing machine, radial impact test machine, air tightness test machine and 30-degree SLIP test machine. Advanced production and processing equipment: over 260 sets of special CNC machines and CNC lathes, continuous heat treatment furnaces, continuous melting furnaces, automatic cleaning lines, painting lines, casting machines and shot blasting machines. With an annual production of 1.5 million sets of motorcycles and ATV wheels and an annual output of 800,000 sets of various wheel products, the company has become the industry's largest production base for motorcycle wheels. The company has obtained national design patents for six motorcycle wheel products developed by it.</p>	
33	Xingji Gear Co., Ltd.	<p>Ownership: private-owned; main products: gears and axles; product field: car, mini car; network: domestic sales/export; established in 1995; factory area: 400 mus; and fixed assets: RMB 350 billion</p>	有详细PP T

34	Chongqing Yongon Rubber & Plastic Co., Ltd.	<p>Chongqing Yongon Rubber &amp; Plastic Co., Ltd. has an annual value of production of RMB 100 million and working capital of RMB 95 million.</p> <p>The company specializes in manufacturing of motorcycles, agricultural machinery and general machinery rubber parts. Its products mainly include: handlebars, covering parts, rubber parts, plastic electroplated parts and hardware electroplated parts (including more than 10 patent products). At present, the company has more than 40 Haitian series injection molding machines and vulcanizing machines of various sizes, detection and testing equipment such as salt spray test chambers, ozone boxes and wearable test chambers and mechanized automatic assembly lines equipped with manipulators throughout the lines and a centralized feeding system for production and operation. The company has long-term cooperative relations with the majority of domestic motorcycle companies including Jialing, Zongshen, Lifan, Loncin, Dachangjiang, Haojue, Jianshe, Yamaha, Haojin, Haojian, Bashan, Yinxiang and Shineray and the majority of foreign motorcycle companies including South Korea DAELIN, India BAJAJ, Italy PIAGGIO and Vietnam PIAGGIO. The company also became a tier one supporting supplier of three private enterprises, namely Zongshen, Lifan and Loncin. Currently, its motorcycle handlebars accounts for 95% of the market share in Chongqing and 60% of the market share in Guangzhou.</p>	
35	Chongqing Yuqing Machinery Spare Parts Manufacturing Co., Ltd.	<p>Chongqing Yuqing Machinery Spare Parts Manufacturing Co., Ltd. is a specialized auto parts mechanical processing enterprise, which is mainly engaged in development, design and processing of undercarriage shaft gears of mini cars (cars). It owns fixed assets of RMB 208 million; has 550 self-contained machining and detection equipment, including over 180 sets of first-class gear manufacturing equipment.</p>	

36	Chongqing Zhongqing Gear Co., Ltd.	Established in January 2013, Chongqing Zhongqing Gear Co., Ltd. is a private joint-stock enterprise with registered capital of RMB 40 million and total assets of RMB 120 million and is mainly engaged in the development, manufacturing and sales of various car transmission shaft gears and disk teeth.	
37	Chongqing Honghuoniao Shoes Co., Ltd.	Chongqing Honghuoniao Shoes Co., Ltd. is a wholly owned subsidiary established by China's largest private shoes enterprise Aokang International in Shoes City of western China. It is a large private shoes enterprise which manufactures men and women fashion shoes, casual shoes and shoes for foreign trade and integrates manufacturing, research and development as well as marketing in western China. As a pilot intellectual property unit in Chongqing, the company invested certain research and development expenses to encourage employees to research and develop projects.</p> <p>By the end of 2013, the research and development team of the company has obtained such outstanding achievements as 15 design patents, 23 utility model patents, 7 inventions, 4 new important products and 1 high-tech product.</p>	
52	Chongqing Bishan Huanqiu Auto Parts Co., Ltd.	<p>Founded in May 1994 and with fixed assets of RMB 56 million, registered capital of RMB 5 million and annual output value of RMB 160 million, Chongqing Bishan Huanqiu Auto Parts Co., Ltd. was awarded the only garden-style unit in Bibei Subdistrict, Bishan District. The company mainly produces mini car engine flywheel castings and processes metal parts. Joint venture car engine flywheels (over 60 kinds of products including Changan Ford (I4) and Changan Mazda (BZ, ZJ69, Z622)) are exclusively designated to be produced. The company mainly produces various products of gray iron HT250-350 materials, of ductile irons QT450-10, QT500-7 and QT600-3.</p>	

53	Chongqing Lanju Industry Co., Ltd.	<p>Chongqing Lanju Industry Co., Ltd. is a sino-foreign joint venture jointly invested by Zhongshan Universal Enterprise Investment Co., Ltd. and Hong Kong Junfu International Co., Ltd. It is formally known as Chongqing Lanju Daily Products Co., Ltd., which is a production base radiating southwest and northwest markets established by Zhongshan Lanju Group (China's largest home health insecticide products manufacturers) in Bishan, Chongqing in January 2002. Currently, the company's main products are "Lanju" brand detergents and Chinese brand products-"Lanju" senior black mosquito incenses. The company invested its fixed assets of RMB 80 million to be equipped with 8 leading automatic production lines of incense coils, 7 sets of automatic briquet presses and the related production and testing equipment.</p>	
54	Chongqing Bishan Sitong Machinery Factory	<p>Founded in 1995 and with fixed assets of RMB 8 million and working capital of over RMB 10 million, Chongqing Bishan Sitong Machinery Factory is a professional manufacturer of automotive transmission shaft sleeves in Chongqing. Main mechanical equipment includes CNC lathes, universal milling machines, universal circular grinding machines, automatic CNC internal grinding machines (bearing grinding machines), grinding machines, broaching machines and linear cutting machines etc.; the company may produce 10 million or more automotive transmission parts of various types and output value of RMB 100 million. The Factory is an enterprise mainly produces automotive parts, specializing in the production of transmission shaft sleeves of medium and high-grade cars, car transmission parts, gear shaft sleeves of car transmission parts, gear shafts, etc. in a high-volume, specialized and series manner.</p>	

55	Chongqing Xingshun Machinery Spare Parts Manufacturing Co., Ltd.	Established in December 2004, Chongqing Xingshun Machinery Spare Parts Manufacturing Co., Ltd. mainly produces and processes automotive brake calipers, automotive brake brackets, automotive transmission parts, brake system parts and other automotive parts. After the rapid development for years, the company has now become a professional manufacturer of key automotive parts. It is a supplier of DCT project of the CTCS (China's key enterprise of complete minicar and transmissions) and Chongqing Tsingshan Industrial Co., Ltd. and has an annual output of more than 3 million (sets of) auto parts.	
56	Chongqing Chuandong Shock Absorber Manufacturing Co., Ltd.	Founded in 1992 and with fixed assets of over RMB 70 million, Chongqing Chuandong Shock Absorber Manufacturing Co., Ltd. is the largest manufacturer of motorcycle shock absorbers in western China and a medium-sized private enterprise integrating research and development, production and sales. It has 40 sets of advanced testing equipment and more than 500 sets of processing equipment with an annual production capacity of 8 million absorbers. There are more than 500 types of absorbers. The company provides supporting parts for Qianjiang Motorcycle, Jialing Group, Jianshe Group, Zongshen Group, Lifan Group, Hengsheng Group, Wuxi Zhongxing, Shanghai Jialing and other large motorcycle manufacturers for a long term. Its products are exported to more than 20 countries and regions including Pakistan, Southeast Asia, South Asia and America.	

57	Chongqing Minfa Automobile Fittings Co., Ltd.	<p>Established in 1990, Chongqing Minfa Automobile Fittings Co., Ltd. is the first private enterprise that manufactures 462Q rockers in China. After the rapid development for more than ten years, the company invested more than RMB 20 million in 2003 and was moved to Dingjia Industrial Park, Bishan County, Chongqing. The company has various types of production and testing equipment of more than 500 sets and is the largest car and minicar valve rocker manufacturer in Southwest Region.</p> <p>In early 2007, the company invested nearly RMB 30 million to import from Denmark a DISA MATCH 130 horizontal flaskless match molding line and a DISA casting sand production line and bring in 3 (sets of) US Inductoterm medium frequency induction melting furnaces, direct-reading spectrograph SPECTROMAXx, casting sand treatment system (matching DISA MATCH130 molding line), core shooter Z8625 and Z8620A and shell core machine Z958 etc. The company newly builds a workshop of 10,000 square meters. Applicable scope of the DISA MATCH 130 horizontal flaskless match molding line is so extensive that it may produce not only black metal castings but also non-ferrous metal castings. Currently castings produced by the company include: all kinds of automobile brackets, exhaust manifolds, flywheel series products, etc.</p>
